## PROJECTS

---

|                                                                                                                                                                                                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Chat with Website</b> <ul style="list-style-type: none"><li>• Developed a chatbot that integrates with a website to provide user support and engagement.</li></ul>                                      |
| <b>Chat with PDF</b> <ul style="list-style-type: none"><li>• Created a chatbot that extracts information from PDF documents and engages in conversation with users.</li></ul>                              |
| <b>Blog Generation</b> <ul style="list-style-type: none"><li>• Built a system that generates blog posts using natural language processing and machine learning algorithms.</li></ul>                       |
| <b>ATS System</b> <ul style="list-style-type: none"><li>• Developed an Application Tracking System (ATS) that streamlines the recruitment process using AI and machine learning.</li></ul>                 |
| <b>Image Caption</b> <ul style="list-style-type: none"><li>• Created a system that generates captions for images using computer vision and natural language processing.</li></ul>                          |
| <b>Object Recognition</b> <ul style="list-style-type: none"><li>• Built a system that recognizes objects in images using computer vision and machine learning algorithms.</li></ul>                        |
| <b>Image Colorizer</b> <ul style="list-style-type: none"><li>• Developed a system that colorizes black and white images using computer vision and machine learning algorithms.</li></ul>                   |
| <b>Chatbot for College Admission System</b> <ul style="list-style-type: none"><li>• Created a chatbot that assists students with college admissions and provides support throughout the process.</li></ul> |

## TECHNICAL SKILLS

---

**Programming Languages:** C, C++, Python, Java

**Cloud Computing:** Google Cloud Platform (GCP), Amazon Web Services (AWS), Microsoft Azure, Oracle Cloud, IBM Cloud

**Data Science and ML Tools:** TensorFlow, Keras, Scikit-Learn, NumPy, Pandas

**Web Development:** HTML, CSS, JavaScript, Flask, Django

**Databases:** Firebase, MongoDB, MySQL, SQLite, PostgreSQL

**Version Control:** Git

**Data Visualization:** Matplotlib, Seaborn, Power BI

**DevOps:** Docker, Kubernetes, GitHub, Nginx

**Computer Vision:** Image Classification, Object Detection, Segmentation, GANs

**NLP:** Text Classification, Sentiment Analysis, Named Entity Recognition, Part-of-Speech Tagging

## CERTIFICATIONS

---

- Introduction to Web Development
- Generative AI with Large Language Models
- Version Control
- Machine Learning Specialization
- Tata Group - Data Visualization: Empowering Business with Effective Insights Job Simulation
